

# ENTREPRENEUR. FAMILY MAN. HERO.

WHAT'S YOUR LEGACY?

*Murray Waitzer was an enthusiastic entrepreneur with an energy and passion for life and a loving commitment to family.*

He was also a diabetic. He knew the everyday struggle of Type 1 diabetes, and he battled with blood sugar levels and daily doses of insulin. And although he passed away in 1971, his fight against diabetes lives on.

Thanks to the Waitzer family's generous \$1 million pledge in honor of their father and grandfather, EVMS is establishing the Murray H. Waitzer Endowed Chair for Diabetes Research. With this donation, our internationally renowned faculty can further the groundbreaking diabetes research that's already impacting our

community. In the classroom, we're teaching the next generation of diabetes experts. In the lab, we're researching new ways to prevent complications and restore damaged nerves. And in the community, we're caring for patients and educating the public on diabetes treatment and prevention.

We're healthier because you're here. You can make a difference, too. Please visit
